

Sr. Editor

We sent our manuscript "Arterial gas values in COVID-19 patients from a health center in Peru" with the corresponding corrections. These corrections are as follows: in the second paragraph we change the appointment, in the results part we specify the area and type cannula used by the patients, in addition in the last part we add conclusions and limitations of this study; all corrections are written with another ink color.

We'll await for further news

Regards,

A handwritten signature in black ink, appearing to read 'Johana del Milagros Acosta Quiroz', written on a light-colored background.
