

6 January 2022

Dear Editors,

I am very thankful that you have considered my submission titled “**Vanguards of Food Safety and Security: Acknowledging the humble Veterinarian and One Health**” for publication in Microbes, Infection and Chemotherapy. The suggested revisions in the comments of the attached manuscript have all been addressed. Moreover, the comments given by the reviewers in their “remarks” have similarly been addressed. The revisions are in red text color in the revised version of the article.

The specifics of these revisions are as follows:

EDITORS' COMMENTS		
Section/Lines	Editor's comments and recommendation	Author's actions and responses
Line 9	storage of food	Revised as advised
Line 9	that best reduce	Revised as advised
Line 11	plays	Revised as advised
Line 12	becoming	Revised as advised
Line 26 to 30	Too long sentence. Re-write	The long sentence was split into 2 sentences
Line 33	Transmitted	Revised as advised
Lines 35-36	infections	The sentence containing the word was revised to “ An important function of this is controlling and eliminating infectious diseases (both zoonotic and non-zoonotic) that are transboundary in nature ”
Lines 37-38	Nutritional and health implications as well (Health is the more generalized term)	Revised as advised
Line 38	noted	Revised as advised
Line 40	in	Revised as advised
Line 42	Reference?? Vegetable protein is usually the main source	The statement was revised as “ with meat being the main source of dietary animal protein ”
Line 44	you mean led?	The word was revised as “result”

Line 47	,	This recommendation was not followed because the sentence will be too long.
Line 48	of pork	Revised as advised
Line 51	???????	The sentence was revised as “The integration of One Health in sustainable food production has highlighted the importance of veterinary medicine in safeguarding animal health and as an aspect of environmental management”
Line 58	There’s still no definition of One health model by the author??!!	The definition of One Health is provided in in Lines 52-55.
Lines 59	trans-disciplinary	Revised as advised
Lines 60	solve	Revised as advised
Line 90	<i>Campylobacter jejuni</i>	Revised as advised
REVIEWER A		
Section/Lines	Reviewer’s Remark	Author’s actions and responses
Discussion	<p>Examples of zoonoses must be mentioned whenever needed. There are a lot of articles, some are below;</p> <p>Histopathology of the kidney and seroprevalence of leptospirosis in wild rats in Baghdad Province, Iraq. Karim AJ, Abbas ZM. 2021. International Journal of One Health, 7(1): 19-30.</p> <p>A review of Listeria monocytogenes: An update on outbreaks, virulence, dose-response, ecology, and risk assessments. Buchanan et al., 2017. Food Control, 75: 1-13.</p>	Revised as advised in Lines 26-30.
Remarks	Requires a thorough assessment of grammar and spelling	Revised as advised
Contributions	<p>Zoonoses is the main link for ONE HEALTH.</p> <p>Enrich the example of the manuscript with articles refer to zoonoses.</p>	Revised as advised in Lines 26-30 and in the conclusion paragraph.
REVIEWER B		
Section/Lines	Reviewer’s Remark	Author’s actions and responses

Contributions	The text lacks depth and originality. It does not appear to be a text with characteristics of a scientific article. In-depth research and analysis is required to make it look like a scientific paper.	The manuscript has been improved. 7 more references and a conclusion paragraph have been added.
REVIEWER C		
Section/Lines	Reviewer's Remark	Author's actions and responses
Line 20	LINE 20. Consider the country or context to which it refers.	"In the Philippines" has been added
Conclusion	End the manuscript with a more tangible conclusion or suggestion, and not just a reference to another author.	A conclusion paragraph was added
References	Verify Vancouver type citation.	Revised as advised
Redaction	Needs some language corrections	Revised as advised
Contribution	is an interesting manuscript, I suggest it can be considered as a letter to the editor.	N/A

Respectfully yours,

The Author
