

REVIEWERS COMMENTS CHANGES MADE (first round)

The Editor in Chief,
Journal of Microbes, Infections and Chemotherapy

Dear sir/ma,

Having received your notification to your decision made by the reviewers on our original research article entitled “**Bioaugmentation Approach using *Pseudomonas* and *Bacillus* for Malodour Reduction in Poultry Faecal Waste Management**” by **Ismail B. Onajobi, Oyindamola J. Samson, Adeniyi A. Ogunjobi, Obasola E. Fagade** considered for publication in the Journal of Microbes, Infections and Chemotherapy.

I hereby write to you that all the corrections and changes indicated by the reviewers in the attached file have been effected sensitively and meticulously. Here is the changes status from the reviewer to our work:

S/N	Reviewers Comment	Status
1	Summary part was mainly concerned on the result. Method used in the research was not clearly described. Please modify summary part	Correction made
2	Presenting an overview of the topics and methods used in this study are not properly explained in the Abstract.	Correction made
3	Clearly state the purpose of the research. "To improve pollution cleanup, shorten clean-up times, and lower costs, bioaugmentation is the injection of pre-grown microbial cultures to boost microbial populations at a site" use different word, and generalize bioagrummentation	Suitable word instead of 'treasure' used
4	This was added to the 250 ml conical flask of chicken excrement. Different methods, such as the addition of (i) cultured broth, (ii) bacterial cells, and (iii) supernatant that was produced by centrifuging cultured broth, were used to seed (inoculate) poultry faecal waste" Please be specific and avoid using Roman numerals when describing.	Effected
5	Please update the reference number 4,6, 19, 24 make it uniform manner	Concentration added

6	The resolution of all images is not clear. Please adjust the font for the image description according to the guide	Description made
7	Are there other bacteria that have been used for bioaugmentation? If any can be added to the introduction (limitations).	Reference included

Furthermore, I hereby write that on behalf of the authors that this is order of author names arrangement for the research manuscript:

Ismail B. Onajobi¹, Oyindamola J. Samson¹, Adeniyi A. Ogunjobi², Obasola E. Fagade²

¹Department of Microbiology, Faculty of Science, Olabisi Onabanjo University, Ago-Iwoye, Nigeria

²Department of Microbiology, Faculty of Science, University of Ibadan, Ibadan, Nigeria

Kindly find the attached file of the corrected manuscript for your urgent reference.

Thank you for your consideration!

Sincerely,

Oyindamola John Samson
